ABOUT ME

With over 2 years of designing "front and back", I have a passion for producing "products" that bring my clients ideas to life.I love working in a collaborative manner with clients in order to design the best possible website.

Armed with over 3 years of education in computer programming and web design, I discovered my passion for this line of work at a young age. I find the most satisfying part of my job is the reaction i get from a happy client.

SKILLS

Javascript ●●●●○
HTML/CSS ●●●●○
Angular ●●●○○
Illustrator ●●●○○

EXPERIENCE

WEB DEVELOPER @ The Visual Medium

JAN 2015 - Present

Developed and maintained various websites. Co-ordinated with cfo to create logos and branded content for clients. Worked on various web projects simultaneously.

FRONT END DEVELOPER @ Chartreusemedia

MAR 2014 - AUGUST 2014

Participated in multiple web based projects, making contributions at different phases of the development life cycle. Learned the fundamentals of good design and colour theory, while participating on severals projects which included working on a press release, logo design, movie posters and press kit.

FREELANCER

MAR 2014 - Present

Constantly improving my development skills by learning new technologies and applying them to small side projects. Developing small pieces for different web applications and doing graphic work for clients as well.
